An average human body requires an intake of 8 glasses of water every day to replace loss of body fluids. And yet, we tend overlook this obvious giver of life as a source of providing energy to the body.

Amega Global has been the pioneer to tap these under-utilized sources of nourishment to replenish not only fluids, but also provide energy to the body.

And yet again, Amega is at the forefront of introducing a practical appliance for everyday use – the Amega AMgizer.

It is a revolutionary cup/ bottle holder with a Titanium disc processed by applying the AMized® Fusion Technology. The disc sources the life force energy from the environment and when the liquid is placed on it, alters the liquid's molecular structure and energizes the liquid in a matter of seconds to its original forms.

Amega AMgizer is a handy and practical tool which can be used in our daily lives. So next time you want to have a drink or are travelling, don't forget to use the Amega AMgizer.

Benefits of Amgizer can include:

- 1) Neutralizes unwanted elements in liquids (energetically)
- 2) Restores the water molecules to its original form
- 3) Energizes the liquids to compliment energy deficiency in the body
- 4) Helps the body to absorb the liquids better
- 5) Increases the potency of the liquids and its ingredients

Direction to use:

Place the cup or bottle in the Amega AMgizer for at least 1 minute before consuming (hot or cold drinks) it. AMgizers can also be placed in a fridge for cold drinks. Do not place AMgizers in microwave ovens.
