

DETERIORATION OF WATER'S CRYSTALLINE STRUCTURE MEANS  
DETERIORATION OF LIQUID CRYSTALLINE MAKE-UP OF THE BODY

A growing number of health professionals are discovering the value of vitalized hexagonal water. That's because water is so important to the healing process. Vitalized water augments any nutritional program, any healing modality, any form of health maintenance and any diet. The use of the Vitalizer Plus, enhances the body's ability to restore balance and coherence, and to move in the direction of a more healthy, vibrant life. Read what health professionals have to say:

All water is not created equal. Qualities like structure, mineral content, and surface tension determine how effectively water is absorbed across cellular membranes to hydrate the body. Since hydration is such a major factor for optimal health, the quality of the water we drink is of paramount importance.

Testing with devices designed to accurately measure the state of health in an individual, clearly show that water treated with the Vitalizer Plus improves a number of health parameters - within minutes. Tests conducted in our office, before and after drinking 1, 8-ounce glass of water treated in the Vitalizer Plus, showed significant improvement. Point scores using Meridian Stress Analysis (MSA) showed a 24.7% improvement within minutes. Heart Rate Variability (HRV) scores likewise improved showing 29.4% improvement in the same 5-10-minute period of time. As indicated by the above, the Vitalizer Plus is clearly a positive step towards achieving better health. It is a significant addition to a complete program of health care and maintenance.
